device for providing a barrier movement in response to access codes received by the receiver.

The barrier movement operator provides a method of learning valid security codes by a security code receiver comprising the steps of receiving a first security code, then within a predetermined period of time receiving a second security code, having a predetermined relationship to the first security code; and storing a representation of the second security code as a valid security code.

REMARKS

The Abstract is also submitted on an enclosed separate sheet. Applicants respectfully request entry of the instant Amendment, and submit that no new matter has been added.

The Commissioner is hereby authorized to charge any additional fees which may be required with respect to this communication or credit any overpayment to Deposit Account No. 06-1135.

Respectfully submitted,
